Weekly Update 1/10/2008

>As some of you may be aware, recently an issue with UPS has occurred regarding deliveries within the resort due to the 2008 Commercial Vehicle Access policy. At today's SOA Board of Directors meeting this policy was discussed at length and the Board has decided to allow UPS access for deliveries until further notice.

>As a result of the Development Relations Committee negotiations, with Intrawest/Placemaking Development, Baytowne Ave. W. will be widened between Club Intrawest and the Village of Baytowne Wharf entrance in order to improve traffic flow in this area. This work will require temporary changes in traffic patterns that may cause delays. The work is projected to take approximately 6 weeks to complete. Your patience during this time of improvements is appreciated.
